

EQUIPMENT- KETTLE

INTRODUCTION

- Kettle is a container or device in which water is boiled, having a lid, spout, and handle. We use Kettle to boil water which enable us to make our tasty gravy fresh every day.

SET UP

- Wash and Sanitize Hands
- You must carry out a Safety check for the kettle.
- Inspect Kettle for damages such as dents on the outside and or broken handle.
- Check the plug wires are safe and working correctly.
- Place Kettle as far as possible from any heat sources, such as fryers, stoves ...etc

CLEANING PROCESS

- empty the kettle from any water.
- Put new fresh water into the kettle.
- Boil the water until it reaches 100degrees centigrade.
- Add limescale remover and leave it for at least half hour.
- Dispose of the water and use 3 step cleaning method to clean inside and outside.
- Rinse with fresh clean water.
- Boil the water once again and dispose of it.
- Use fresh water to boil to mix with your new batch of gravy.
